INDOSEN INFRA TECH

ENGINEERING & CONSTRUCTION SERVICES

"Empowering future with renewable construction & energy! "

COMPANY PROFILE

- In 2018, our journey began in INDIA as a specialized firm,
- focusing on renewable construction projects (Villas, Apartments, Ground mounted solar projects and Rooftop projects). Since then, we've evolved into a dynamic force in the renewable industry, consistently delivering excellence in every project we undertake.
 - INDOSEN has established and extending our wings in SENEGAL and other part of countries itself as a leading player in the renewable construction & energy sector.
 - Specializing in Engineering, Procurement and Construction (EPC) services.
 - Our expertise extends across a wide spectrum of renewable Energy, Procurement, and Construction (EPC) projects, including villas, single buildings, apartments in civil and in energy ground-mounted solar power installations and solar rooftop projects. We proudly serve a diverse clientele, encompassing State and Central Government entities, as well as private enterprises across industrial, institutional, residential, warehouse, and poultry farm sectors.
 - Leading concern of various latest technological development in Renewable energy.

OUR SERVICES

- **Development:** Embarking on a journey of tailored excellence, we craft comprehensive development processes that align precisely with our client's unique visions and requirements. The project development journey begins with conceptual drawings and extends seamlessly to land acquisition, navigating statutory requirements, and conducting thorough land surveys and soil testing. This holistic approach ensures that every aspect of the project is meticulously planned and executed to perfection.
- **Design Engineering:** At the vanguard of innovation, our seasoned team leads the way in pioneering cutting-edge design solutions, meticulously crafting blueprints that maximize the potential of solar projects, delivering unmatched performance and efficiency. Additionally, we offer engineer consultancy services for both construction, electrical & energy ground-mounted solar projects and rooftop installations. Moreover, we specialize in construction of villas, apartments, commercial complexes and group houses, and beyond.
- **EPCC:** Our comprehensive EPCC (Engineering, Procurement, Construction, and Commissioning) service covers both for construction and energy of ground-mounted and rooftop solar power projects. With our end-to-end management approach, we ensure seamless execution and timely delivery, every step of the way. For government and private industries alike, we specialize in the installation of cutting-edge CCTV camera systems, providing robust security and surveillance solutions. Our tailored installations ensure comprehensive coverage and reliable monitoring to safeguard assets and personnel effectively.
- **O&M:** "Sustaining brilliance beyond installation, our Operations and Maintenance services stand as the guardians of solar reliability and performance. With meticulous attention to detail, we ensure that your solar investments remain a beacon of efficiency for years to come.

SERVICES OFFERED

Installation and Commissioning

- **Technical Consultation**
- **Civil**
- **Land survey & soil testing**
- **Electrical**
- **Testing and Commissioning**
- **Mechanical (Fabrication and Erection)**

Manpower Services

- **Technical Component person**
- **Hi skill Manpower for Civil and electrical work**
- **Consultancy for solar and wind**

SERVICES OFFERED

Solar Project (Industrial/Residential)

- **Ground Mounted Solar**
- **Rooftop Solar Project**
- **Wind Project for industrial**

Civil Construction works

- **Villas**
- **Apartments**
- **Industrial plants**
- **Land Survey**
- **Topographical Survey**
- **Soil Testing**

Material Supply

Electrical / Civil / Equipment's

- **Transformer**
- **String Inverters DC to AC HT and LT Cable**
- **HT, LT, Panel**
- **Module**
- **L A & Earthing strip Scada**
- **Excavators**
- **Frontend loader with back hoe (JCB)**
- **Dumpers / Tippers**
- **Stone Crushers and etc.,**

Material Supply

Mechanical

- **MMS**
- **All types of steel & GI Structures and pipes**
- **Pumps & Motors**
- **UPVC/CPVC Pipes**
- **Febr. & Erection of all types PEB & Structural work**

SUPPLY CHAIN

- As an authorized dealer of APN Solar Modules and associated products, we uphold a commitment to excellence by incorporating premium-quality components into all our projects. Our adherence to the highest industry standards guarantees the reliability and longevity of our solar solutions.
- As an authorized dealer of HD Crystal Technology India, we offer comprehensive CCTV camera system installations on a PAN India basis. Our partnership ensures access to state-of-the-art technology, allowing us to deliver top-quality security and surveillance solutions tailored to the specific needs of our clients across the nation

Expertise

- INDOSEN INFRATECH specializes in the seamless execution of a wide array of solar power projects, encompassing both ground-mounted and rooftop installations. Our proficiency extends beyond conventional setups; we excel in implementing innovative solutions such as module cleaning systems and solar water pumps, enhancing the efficiency and reliability of solar plants to their fullest potential.

"INDOSEN INFRATECH is passionately committed to the adoption of renewable construction & energy and actively contributing to a sustainable future for generations to come. Through our innovative solutions, we strive to make a meaningful impact on the nation, paving the way for a brighter and greener tomorrow."

KEY MEMBER

Advisor,
Directors & CA
Vikesh Singh

Mr. Vikesh & Mr. Sachin has more than 15 years of expertise in the field of renewable business, He is a veteran specialist.

With expertise in responsibility, compliance, and HSSE, He has managed projects worth US \$5 million and led service delivery in the equipment rental business generating US \$0.50 million in revenue.

Promotor
Sachin Dhaka

Mr. Vikesh & Mr. Sachin has also played a pivotal role at Senegal, Dubai, Mali, Guinee Conakry and other overseas heavy equipment & tiles supply services for a installation and operation base, and Maintenance Services across multiple states, managing approximately 5 to 10 sets in assets.

KEY MEMBER

**Technical Director
Narasimha Raju**

Civil Engineering degree from Manipal University Udupi, Karnataka, ranking sixteenth in the university, complemented by a Project Management certification from IPMA-D and a PGDM from IGNOU. With over 34 years of diverse expertise, primarily as an owner's representative, specializing in the construction of heavy industrial projects, solar plants and power plants.

Noteworthy involvements include managing the construction of significant projects such as:

- 125MW Thermal Power Plant in Dakar, Senegal (WA)
- Construction of more than 25 high-rise buildings.
- World's number one dual cement plant (white & gray) capacity of 1200/2400 TPD largest cement Plant in Ras Al Khaimah, UAE
- India's first Supercritical Thermal Power Plant in Mundra, boasting a capacity of 4620 MW
- Overseeing the construction of 5 power plants, totaling 1,920 MW, encompassing thermal, gas, and solar energy sources."
- Overseeing the construction of 16 cement plants, totaling 110,360 TPH, encompassing single and double stream cyclones ."
